

4 Day Site Safety Supervisor Course – CSR Gold Card

Duration: 4 Days

Overview: This course is intended to give site Supervisors, or anyone who has the day-to-day responsibility of supervising safety on construction sites, a clear understanding of how Health and Safety affects their role and the practical steps they can take to ensure a safe site.

The course consists of 4 days theory (classroom based), which will generally run on the same day each week for 4 weeks. Bemac will supply the manuals required and all materials on the first day of training.

Following the successful completion of the full 4 days, a 'Touch Screen' Health & Safety Test will be completed by each candidate at one of the 6 Test Centres situated around the province. Bemac will arrange the date and place for this test on the last day of training.

In addition to the 4-day course candidates will need to hold a relevant Supervisors NVQ to gain the gold card.

Candidates currently registered on an NVQ can instead gain a red 'Experienced Supervisors Card'. The Red card can be upgraded on completion of the NVQ.
