

## **COSHH Assessor Course**

Using chemicals or other hazardous substances at work can put people's health at risk. The Control of Substances Hazardous to Health Regulations (COSHH) require every employer to identify the substances in use at the workplace and to 'assess' whether they present a risk to employed persons. Such assessments must be recorded and any risks prevented or controlled. This course covers the statutory requirements, the process of assessment and the methods and monitoring of control strategies.

### **Who should attend?**

Everyone involved in completing or assisting with workplace risk assessment.

### **Key topics**

COSHH Regulations  
REACH  
CPL  
Forms of Chemical Agents  
Forms of Biological Agents
